

Impact | Effect of the Measures Taken at the Tempelhof Lab Concerts

Impact dimension	Impact Tempelhof Lab	corresponds to approx.
Carbon Management	1.407 tons of CO ₂ savings	~ 1.407 Tsd. Flights from Frankfurt to New York*
Water Management	~ 99 million liters water savings (includes supply chains)	~ 2 million showers
Circularity	~ 3,5 tons of waste prevented	~ 45 % less waste that could not be fed back into material cycles
Material Health	~ 20% of the survey participants have at least one material health certificate. Approx. 1/3 of the service providers responded to the survey.	
Social Fairness	~ 20% of the survey participants have at least one social fairness certificate. Approximately 1/3 of the service providers responded to the survey.	
C2C Awareness	Under evaluation	

47% of the CO₂ potential between conventional and currently implementable C2C ideal event was realized at Tempelhof Lab
